Summary

Undergraduate Information Technology student with hands-on experience building full-stack web and mobile applications using React, Next.js, Spring Boot, and Node.js. Experienced in designing microservices architectures with Apache Kafka, API Gateway, and Docker, and in setting up CI/CD workflows with GitHub Actions. Skilled in designing RESTful APIs, integrating databases, and working with AI-powered tools such as LangChain, the OpenAI API, and Groq AI. Keen on building efficient, scalable solutions from responsive frontends to secure backend services.

Education

B.Sc. (Hons) in Information Technology 2023 – Present
University of Moratuwa GPA: 3.12/4.00

G.C.E Advanced Level Examination 2019 – 2022
Atchuvely Center College Z-Score: 1.7741

Results: Mathematics: A, Physics: B, Chemistry: B

Skills

- **Programming Languages:** Java, Python, C, JavaScript, TypeScript
- **Frameworks & Libraries:** React, Next.js, React Native, Expo, Redux Toolkit, Spring Boot, Spring Cloud, Node.js, Express.js, FastAPI, Tailwind CSS
- **Databases & ORMs:** MySQL, MSSQL, PostgreSQL, MongoDB, ChromaDB
- **Cloud, Tools & Integrations:** Docker, Docker Compose, GitHub Actions, Apache Kafka, Maven, Git, GitHub, Stripe, PayHere, JWT
- **Software Architecture:** Microservices, RESTful APIs, API Gateway, Service Discovery (Eureka), Full-Stack Development, AI/LLM Integration (LangChain, OpenAI API, Groq AI)

Projects

SmartJob – AI-Powered Job Portal (Full-Stack Microservices Application) Source Code

- Developed a full-stack recruitment platform with 7 Spring Boot microservices, integrating API Gateway, Eureka service discovery, and centralized configuration.
- Implemented JWT authentication and role-based access for 3 user types—Job Seekers, Employers, and Administrators.
- Built asynchronous workflows across 3 Kafka topics to automate candidate evaluation, application updates, and notifications.
- Integrated AI-powered resume matching to generate candidate scores, identify skill gaps, and support employer screening.
- Enabled resume text extraction across 3 document formats—PDF, DOC, and DOCX, supporting uploads up to 5 MB.

Tech Stack: Java 21, Spring Boot, React, Redux Toolkit, PostgreSQL, Apache Kafka, Spring Cloud, Groq AI, Docker, GitHub Actions

Serani AI – AI Personal Assistant (Group Project) Source Code

- Contributed to the development of Serani AI, an AI-powered personal assistant for Web and Mobile platforms.
- Developed the AI chatbot interface with persistent chat sessions, conversation history, file uploads, message editing, and AI response analysis.
- Integrated OpenAI API and LangChain to support AI-powered conversations and intelligent response generation.
- Worked with ChromaDB for storing and retrieving relevant information to support context-aware AI interactions.

- Developed responsive Dashboard, Settings, and Profile interfaces with user preferences, profile management, and light/dark theme support.
- Integrated frontend components with REST APIs for chatbot, user management, and conversation-related functionality.

Tech Stack: React, React Native, Expo, Python, FastAPI, MongoDB, ChromaDB, LangChain, OpenAI API, Tailwind CSS

NextGen – E-Commerce Platform (Individual Project) Source Code

- Developed a full-stack e-commerce platform using React, Node.js, Express.js, and MongoDB with a responsive user interface and Redux Toolkit for global state management.
- Implemented JWT-based authentication and authorization with secure password handling using bcrypt.
- Developed RESTful APIs for product, cart, user, review, and order management.
- Integrated Stripe for secure online payment processing and Cloudinary for product image storage.
- Built an admin dashboard with Chart.js to visualize sales and order statistics.

Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS, Redux Toolkit, Stripe, Cloudinary, Chart.js, JWT

Inventory Management System (Full-Stack Project) Source Code

- Developed a full-stack inventory management system using Spring Boot REST APIs and a React + Vite frontend.
- Implemented JWT-based authentication with role-based access control for administrators and managers.
- Built modules for product, category, supplier, purchase, sales, and transaction management, including product image upload and storage.
- Created dashboard analytics and transaction history views using Recharts, with Spring Data JPA/Hibernate and MySQL for database persistence and entity relationships.
- Implemented protected frontend routes with React Router, integrated APIs using Axios, and applied validation, DTO mapping with ModelMapper, and Spring Security for secure backend operations.

Tech Stack: Java, Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, MySQL, React, Vite, React Router, Axios, Recharts, Maven, Git

Certificates

- Getting Started with Git and GitHub – Certificate
- Developing Front-End Apps with React – Certificate
